Question 1. Write down sets in order of containment. We pretend that equivalence classes are just numbers.

$$\mathbb{C} \supset \mathbb{R} \supset \mathbb{Q} \supset \mathbb{Z} \supset \mathbb{N} \supset \mathbb{P} \not\supset (\mathbb{F}_7 = \mathbb{Z}/7\mathbb{Z}) \supset \{\emptyset\}$$

Question 2. Give an example element of $\mathcal{O}(n)$. Take $11n \in \mathcal{O}(n)$.

Question 3. Find roots of $x^2 - 8x = 9$. We proceed by factoring,

$$x^{2} - 8x - 9 = 9 - 9$$

$$x^{2} - x + 9x - 9 = 0$$

$$x(x - 1) + 9(x - 1) = 0$$

$$(x - 1)(x + 9) = 0$$

$$x \in \{1, -9\}$$

Subtract 9 on both sides.

Breaking the middle term.

Pulling out common factors.

Pulling out common (x-1). $f(x)g(x) = 0 \Rightarrow f(x) = 0 \lor g(x) = 0$.

Question 4. Show $P \stackrel{?}{=} NP$. Let P be zero... Sorry.
